

Anti-graffiti Film

■ Overview

This anti-graffiti film is highly water and oil repellent, making it easy to clean off even when spraypainted.

■ Details

Because the film has adhesive on the back side and is transparent and highly weather resistant, it does not hide underlying colors or patterns. The product can be used long term even outdoors. The film also reduces ultraviolet light to prevent posters, signs, and information boards from fading and protecting the surface underneath.

■ Application Billboards, signage

■ Product size 1230mm × 50m
