

KIWACAL

Self-cleaning Film

■ Overview

The surface of KIWACAL Self-cleaning Film has super hydrophilic properties which cause any dirt to be naturally washed off by rain water to maintain a beautiful exterior.

■ Details

The highly weather-resistant, transparent resin film surface features a special silica microparticle finish that naturally removes dirt. The back side of the film contains adhesive, is transparent, and reduces ultraviolet rays, making it perfect for keeping the color from fading on posters, signs, and information boards.

■ Application Billboards, signage

■ Product size 1240mm × 50m
