

KIWACAL

Photoluminescent Film (PHF-60 PHF-P2)

■ Overview

KIWACAL photoluminescent Film absorbs and stores the energy of sunlight and electric lighting, then gradually releases it in dark places.

■ Details

Because photoluminescent film can absorb, store, and release light repeatedly, it is perfect for evacuation route signage. The glow intensity and time differs depending on the grade.

■ Application Billboards, signage, construction materials

■ Product size 1000mm × 50m
